

Seminar on sensory integration

The Final year BPTTh students of M.A. Rangoonwala College of physiotherapy attended a neurophysiotherapy guest lecture on the topic of Sensory integration on 23/03/23. The speaker, Dr. AnupamaRisbud, who is currently a consultant pediatric therapist at Vidula Child Guidance Centre in Pune, explained the students about the application of this technique to the pediatric population suffering from Autism spectrum disorders. She focused on the different clinical features of conditions that fall under the autism spectrum and differentially diagnosing each of them. She emphasized the importance of using equipment that provide a wide range of textures to stimulate the sensory systems. The lecture was made highly informative and interactive with the use of visual aids for explanation. We are thankful to management and Principal for arranging the Talk.
